A wide-angle night photograph of a city nestled in a valley, viewed from a high vantage point. In the foreground, the dark silhouette of a ski lift tower and its cables are visible on the left. The city below is illuminated by numerous streetlights and building lights, creating a warm glow against the dark sky. In the background, a range of mountains is visible under a dark, cloudy sky.

Project Objective

- Offer ***ski-resort recommendations*** based on user reviews describing specific aspects of the resorts

Data & Tools

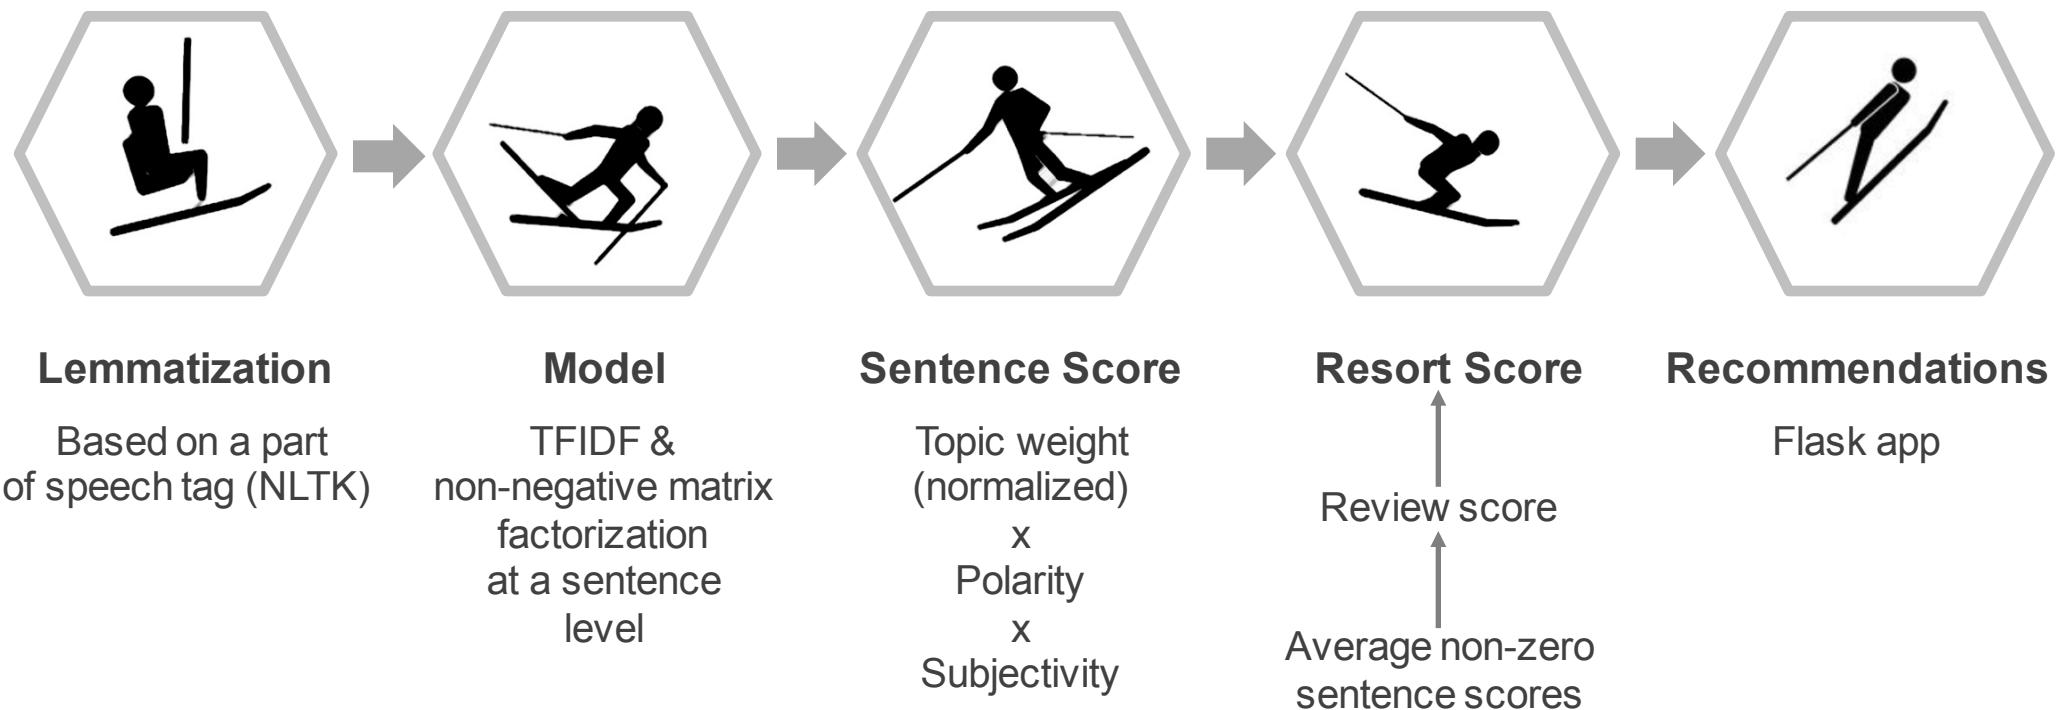

- 85,000 reviews in English (~500 ski-resorts)

- Used to QA
- Geographies
- Ski-resort stats (elevation, vertical drop, etc.)

Model

Topics

Identified Topics:

1. Scenic views
2. Powder
3. Food/restaurants
4. Beginner
5. Family-friendly
6. Kids ski-lessons
7. Wait times

Breath taking views, amazing runs!

This Mountain is a hidden little gem! What an amazing place! The view is magnificent and the snow is sublime! We were fortunate to have a gorgeous sunny day and perfect conditions. There is a gondola and a couple other quads. The majority of runs are for intermediate/ expert skiers...in my opinion the green (easy) runs are not easy but very long and lots of fun! We highly recommended this mountain for a ski vacation. One negative note was the food in the lodge. Our lunch was ridiculously expensive and disgusting. I am nauseated just thinking about it. We each had a 9" pizza each that had an "off putting" flavour and was made with frozen vegetables. It tasted like a really bad frozen pizza. The lunch included soup of the day (mushroom) made with canned mushrooms and a very small soda. We got the special and it came to \$46! We originally wanted to eat in the pub but we could not get any service and unfortunately switched to the self serve restaurant/ cafeteria across the hall. We highly recommend this ski spot...its dreamy! Just make sure you bring your own lunch! P.S- Le Massif offers a really cool ski pass instead of a sticker for your coat. You put the pass card in your pocket and it automatically opens the gate to the lift. Really cool technology!
